Mr. and Mrs. Wilbur Cushman visited his parents, Mr. and Mrs. E. O. Cushman Sunday.

A Timely Warning

ELEVEN well-known automobiles have advanced in price within the last ninety days.

The Maxwell Company has not increased their prices. We do not know what their plans are, but we do know *and you know* that materials entering into the construction of good automobiles now cost from 20 to 300 per cent more than they did six months ago.

Nothing is to be gained by delay. Much may be lost.

Not only may you lose several dollars in the purchase price, but you are sacrificing the enjoyment, the relaxation, the health-giving properties—everything, in fact, that makes motoring the favorite pastime of the nation.

We urge you to come in and investigate the Maxwell.

Or, we will refer you to any number of Maxwell owners and let them tell you their own story in their own way.

They will tell you what they have told us. That the Maxwell is good-looking—that it is powerful—that it is comfortable—that it is economical—in short, that it is the best investment they ever made. They will tell you more and they will tell you gladly and freely.

That's the way they feel toward us and the Maxwell Car.

Whatever you do, don't put this off. We have a few cars on hand and can take orders for immediate or future delivery—at present prices. If you can't come in today, phone us for a Maxwell demonstration.

Barrett Money Savers for Farmers

The Next Best Thing to Making More is Saving More

WE WANT you to read about the articles mentioned in this advertisement and then see if you are not losing money by failing to use all or some of them. Every one of these is a leader, a specialty for farm and home and we'll be glad to tell you more about them.

AMATITE ROOFING—Here is a ready roofing that needs no painting or other attention to keep it watertight. Amatite Roofing has a mineral surface that laughs at wind and weather. Very attractive because of its bright, sparkling appearance. Wherever you have steep roofs, you need Amatite. Amatite is made in rolls of 110 square feet with galvanized nails and cement in center. Try it.

EVERLASTIC ROOFING—Here is a ready roofing of wonderful value. No better "rubber roofing" has ever been made at the price. Everlastic Roofing is ready, easy to lay and sure to wear. You don't need skilled labor to lay it. Durable and inexpensive. The solution to your roof troubles.

EVERJET—On every surface exposed to the weather, you need Everjet Elastic Paint. It is the best carbon paint ever made and carbon paint is a sworn enemy of the weather. There isn't a felt or metal roof in the country that could not be improved by a coat of Everjet. It clings, penetrates and protects. Everjet is wonderful on iron work and farm implements. Its sparkling black surface is tough and elastic. Never cracks or peels. You ought to keep this paint on hand always.

CARBONOL—The most necessary thing you could have around the house is a bottle of Carbonol. It is the best disinfectant, healer and cleanser ever made. Removes grease, germs and odors. Therefore, put some in the water with which you clean house. Heals cuts and wounds; prevents blood poisoning. Wonderful in the sick room because it prevents contagion. It will keep your stable or hen house clean and drive flies away from garbage pails or cattle pens. The best thing you could have for a hundred different uses. Get a bottle today.

CREONOID—When it's so easy to have healthy, profitable live stock, why not try this idea. Put some Creonoid in the barn and poultry house and spray the cattle. Creonoid insures clean, healthy cows, horses and chickens. Creonoid is the most effective lice destroyer and cow spray ever made. You need it, perhaps right now. Wonderful in the piggery, too. Makes better porkers. Sold in 1, 5 and 10 gallon cans, half barrels and barrels. Follow directions carefully.

WOOD PRESERVATIVE—Do you want to add many years' wear to your fence posts and exposed woodwork? You can do it by treating them with Barrett's Grade-One Creosote Oil. Its use is the safe, practical and inexpensive way to make fence posts, clothes posts, or porch steps immune to the attacks of weather, earth or moisture. You know the preservative value of creosote. Being a liquid oil it can be applied by simply dipping, spraying or brushing. No expensive method. That's why Barrett's Grade-One Creosote Oil is practical for the farmer. And it actually penetrates deeper into the wood than any other preservative. Protect your timber with Barrett's Grade-One Creosote Oil and begin now.

ELASTIGUM—Don't tinker, delay and experiment with the little everyday repairs. We have a product that makes such repairs not only cheap and easy, but permanent. It's called "Elastigum" because it's a tough, elastic, adhesive, waterproof cement. Has no equal for joining or relining gutters, sealing joints or stuffing cracks. Invest in some Elastigum now and have an ever-ready handy man in future. A trial will prove that it's indispensable. Make that trial now.

TYLIKE Shingles—TYLIKE SHINGLES—All that is desirable in a roofing is combined in Barrett's Tylike Shingles. They last longer than any other roofing. They are fire-resisting. They are fireproof without painting. You ought to see these shingles to see these shingles. They are made of crushed slate on a tough, waterproof base. Pure natural slate, in red or green, without artificial coloring. Acetic acid in everything but price. You lay them like slate, but they look better and cost less.

Sold by all good dealers everywhere. Send for new "Money Saver" Booklets.
